

Melt temperature transducer

Model: WR-200 (Special for plastic machine)

Description

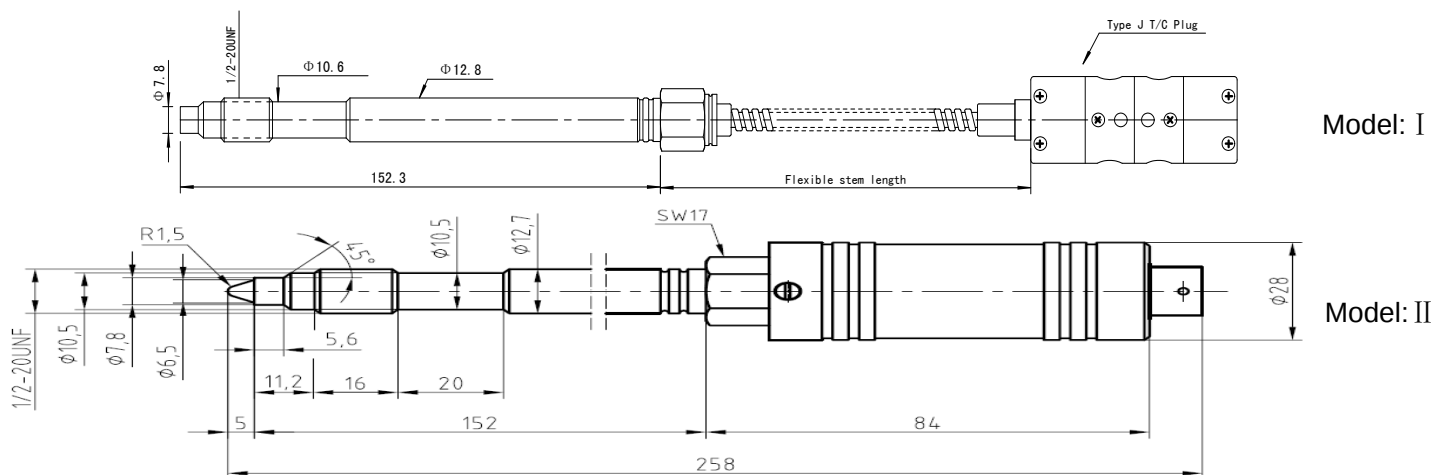

WR-200 Series temperature transducer adopts excellent temperature sensing elements; consummate encapsulation technology and perfect assemble process to insure the quality and performance. This series has the advantage of fast thermal response time, strong thermal resistance capability, high pressure resistance, various temperature elements to choose, diversiform installation etc.

Feature

- ◆ Type J, K, E, PT100 optional
- ◆ 0 to 1300°C measurement range
- ◆ Immersion lengths to match applications
- ◆ Spring or armor adjustable

Dimensions

Specification

Temperature range: 0 to 1300°C

Output: 4-20mA optional

Power supply: 10~30VDC

Error: 0.1%FS, 0.3%FS, 0.5%FS

Media compatibility: 316L stainless steel

Process connection: 1/2-20UNF, M14*1.5

Protection tube: Stainless steel 6mm and 8mm dia.

Insert length: 6inch, 9inch

Tip Length: 0mm, 5mm, 10mm, 15mm

Sensing element: J, PT100 temperature sensor

Electrical connector: 2PIN or 3PIN special connector
