

Regenerative blower LD 055 H43 R18

LD series regenerative air blower features:

1. vacuum and blowing function can be used at the same time. can be running at 50Hz and 60Hz at the same time.
2. oil-free type ring blower, make sure outgoing air is totally pure.
3. high pressure, large air flow, low noise and light weight. The space between impeller and casing; rotor and cover is very tiny, make sure the pressure will be higher.
4. Impellers are special designed, in order to make itself high precision, durable, large air flow and longer working life.
5. Reliable quality, LD series ring blower can be working at above 5000M sea level and it can also bear high temperature and cold temperature.
6. Maintenance free design within 12 months.
7. CE, CCC, certificate

Feature

- Model: Regenerative blower LD 055 H43 R18
- Phase: 3
- Frequency: 50/60 (HZ)
- AirFlow: 530 (m³/h)
- Voltage: 220/380V (V)
- Pressure: 300 (mBar)
- Weight: 63 (kg)
- Stage: 1
- Power: 5.5 (kw)
- Current: 12.9 (A)
- Vacuum: 300 (mBar)
