

**PORTABLE HYGROMETER****TK-100 - Model YN**

- Measurement Range from **-100 to +20 degC**
- **+/- 2 degC Accuracy**
- **Compact Size, Light Weight**
- **Long Battery Life**
- **Easy Connection to sampling line**
- **Simple Operation**
- **Traceability to National Standard**

**Overview**

The Hygrometer TK-100 Model YN is a battery-powered portable instrument. It is suitable for the field measurements where electrical power is inconvenient or the multiple-points measurements. TK-100 Dew Point Transmitter is set inside of the instrument for the measurement from **-100 degC dp** to **+20 degC dp**, at an accuracy of **+/- 2 degC dp**.

**TK-100 Transmitter**

The core measurement tool for Model YN is TK-100 Dew Point Transmitter, manufactured by TEKHNE Corporation, Japan. TEKHNE Ceramic Sensor is designed to secure the best mixture of accuracy, high response speed and long term stability. Most advanced technology is used for this purpose.

Also, the advanced microprocessor technology realized temperature compensation mechanism, which minimizes the effect by process temperature to the dew point measurement.

**Portability**

Model YN is small, by 160 x 160 x 88 mm, and light weighted at 2 kg. It is developed based on the customers' voice; "easily bring it on business trip by train or by air".

**Power**

Model YN contains re-chargeable Lithium battery inside of the instrument. The battery makes the instrument work for 24 hours, by only 3 hours charge time. You can use it continuously over 24 hours, by the operation with battery charger connecting.

Battery status can be easily monitored by 3-status display for AC Power Supply, Charge and Discharge exist in the front panel.

**Easy to Use**

One of the most important features for such instruments is how easily users start operation. Model YN needs only 3 steps for measurement, those are; Charge the battery, connect the line and press start button. So the product does not choose users, but users choose the product, right now.

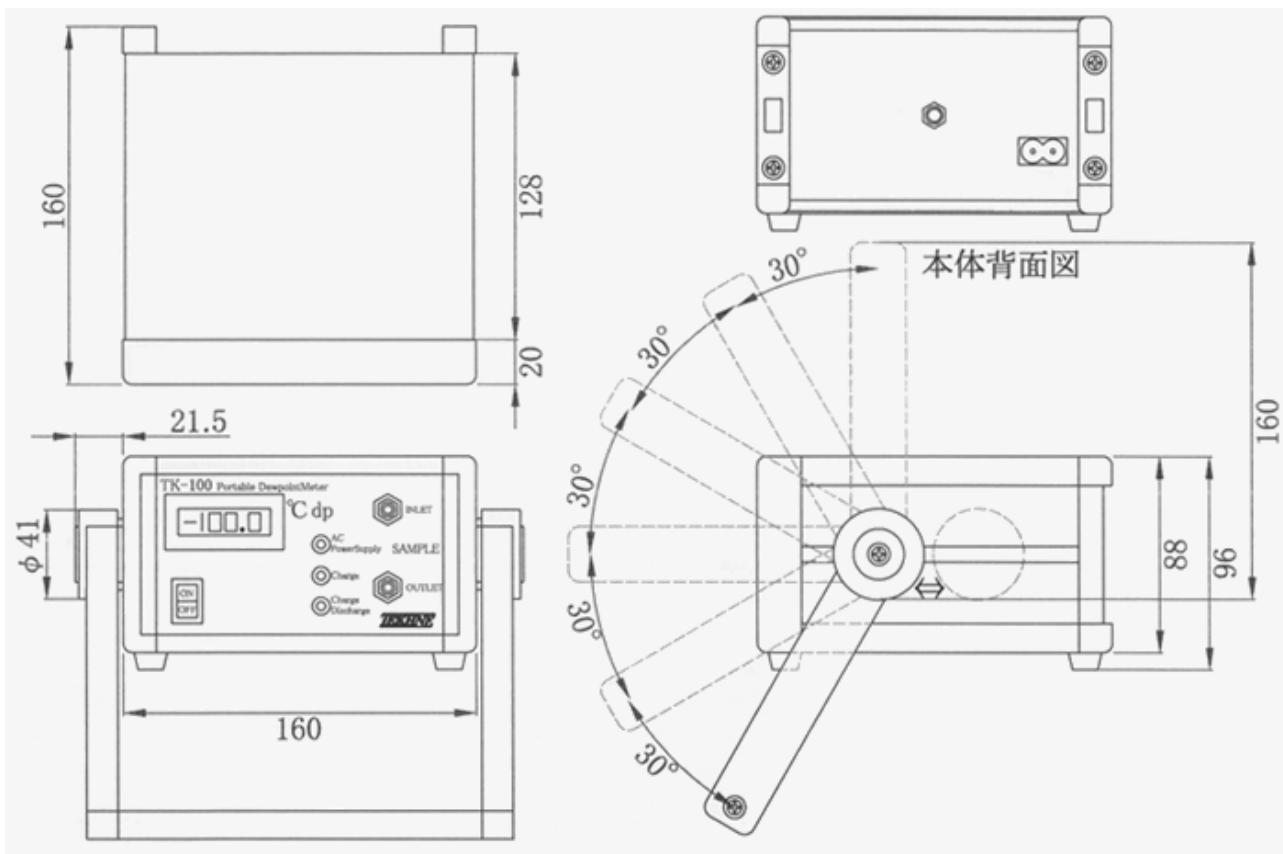

**Options**

- { 6 mm or 1/4" OD Pipe Connection
- { Sampling Set
  - including Filter, Needle Valve and Flow Meter
- { Carry Case

## Technical Specifications

<b>Display</b>	3.5 digit LCD	<b>Output</b>	4~20 mA
<b>Range</b>	-100 to +20 degC dp	<b>Power</b>	Re-chargeable Battery, or 100 – 240VAC
<b>Accuracy</b>	+/- 2 degC dp	<b>Charge time</b>	3 hours
<b>Operating Conditions:</b>		<b>Run time</b>	24 hours
<b>Pressure</b>	1 MPa max.	<b>Weight</b>	2 kg
<b>Flow Rate</b>	1 to 5 L/min	<b>Size</b>	160 W x 88 H x 160mm D
<b>Temperature</b>	0 to +40 degC	<b>Sample Connection</b>	6 mm (standard), or 1/4"(optional) OD pipe connection
<b>Humidity</b>	45~85%	<b>Traceability</b>	NIST Traceable
<b>Storage Conditions:</b>			
<b>Temperature</b>	-10 to +60 degC		
<b>Humidity</b>	45~85%RH
